

SERIAL 2 PAIR - 22AWG

AACS01

Description :

Solid Bare Copper Conductors. Band Marked PVC Insulation. Ripcord for Easy Jacket Stripping. Gray PVC Jacket. Meets CAT3 Electrical Requirements. Used for telephone system wiring, is the mandatory minimum cable specified by the FCC for new home construction in order to ensure broadband capabilities. CAT3 cable can be used for network installations, although for this purpose it has been abandoned in favor of higher speeds produced by the newer Category 5e and Category 6 Cable.
