

HAND HELD METAL DETECTOR

ADHM1

Specifications:

1. Operating frequency: 20kHz
2. Weight: 272g (including the battery)
3. Size: Length: 420mm* Width: 138mm*Height: 110mm
4. Handle measurement: 30 x 30mm
5. Regulate the way: manual
6. Indicator: BZ, vibration motor
7. LED light proves:
 - Red warning; Green ON; Yellow LOW BATTERY;
8. Battery: 9V battery (suitable for working for 40 hours normally)
9. Control: circulation switch (On, Off, a sound of light or mode of vibration)
10. Uses cycle-switch to switch sound alarm and hidden vibration alarm respectively
11. Highly sensitive, detect ferrous and non-ferrous and stainless steel weapons
12. Sound and light alarm simultaneously
13. Warn automatically when short of voltage
14. Simple, convenient to use, easy to adjust
15. Detecting distances:
 - 1/2 pin: 10mm
 - Model 64 pistol: 150mm
 - 6" dagger: 150mm
 - 8mm (diameter): 40mm
 - Aluminum & copper sheet: 10mm
 - DIP14 IC (integrate circuit): 5mm
 - Silver ring (1g): 40mm
 - Lead brick (1g): 30mm
