

HAND HELD METAL DETECTOR

ADHM3

Features:

1. Streamlined appearance, small and exquisite, easy to carry; easy to use, convenient, no need to adjust;
2. With battery voltage indicator; When the battery is low, the yellow light will on, to remind you to charge or replace the battery;
3. Electricity province, 250MA battery charging time can work continuously for more than 40 hours; When 9V battery down to about 7V, the same detection range;
4. Two alarm modes are available: LED lights and audible alarm or vibrating alarm;
5. Light weight, large area detection sensor to detect speed;
6. There are high and low two kinds of sensitivity options;
7. Has an external charging jack: After installing rechargeable battery, you can charge your detector with a charger(12VDC power supply);
8. Super shock resistance, durable, one meter height of free fall without damage.

Technical Parameters:

1. Alarm Indication:
 - Flashing green LED: Power
 - Flashing red LED: Target has been detected
 - Continuing yellow LED: Low Voltage Directive
 - Metal indication LED: detection of objects of different sizes, the light from green to red gradient
2. Power supply: 9V battery standard
3. Power consumption: max 270MW
4. Operating frequency: 22KHZ
5. Standby current: <5MA
6. Operating Voltage: DC 7 ~ 12V

7. Working temperature: -10 °C ~ 65 °C
8. Reset time: 0.5 seconds, the automatic
9. Weight: 170g (without batteries)
10. Size: 295mm * 68mm * 28mm

Detection Range:

1. Staple : 30—50mm
2. Tiananmen-style pistol : 200mm
3. 38 Caliber Pistol : 250mm

Applications:

1. Airports, railway stations, docks electronic detection checks;
2. customs, public security, frontier defense, the defense department security checks;
3. Medicine, food quality inspection business systems;
4. Sawmill detection nails, important places, playground safety inspection;
5. Precious metal detection, such as gold and silver jewelry factory, electronics factory.
