

## WALK THROUGH METAL DETECTOR

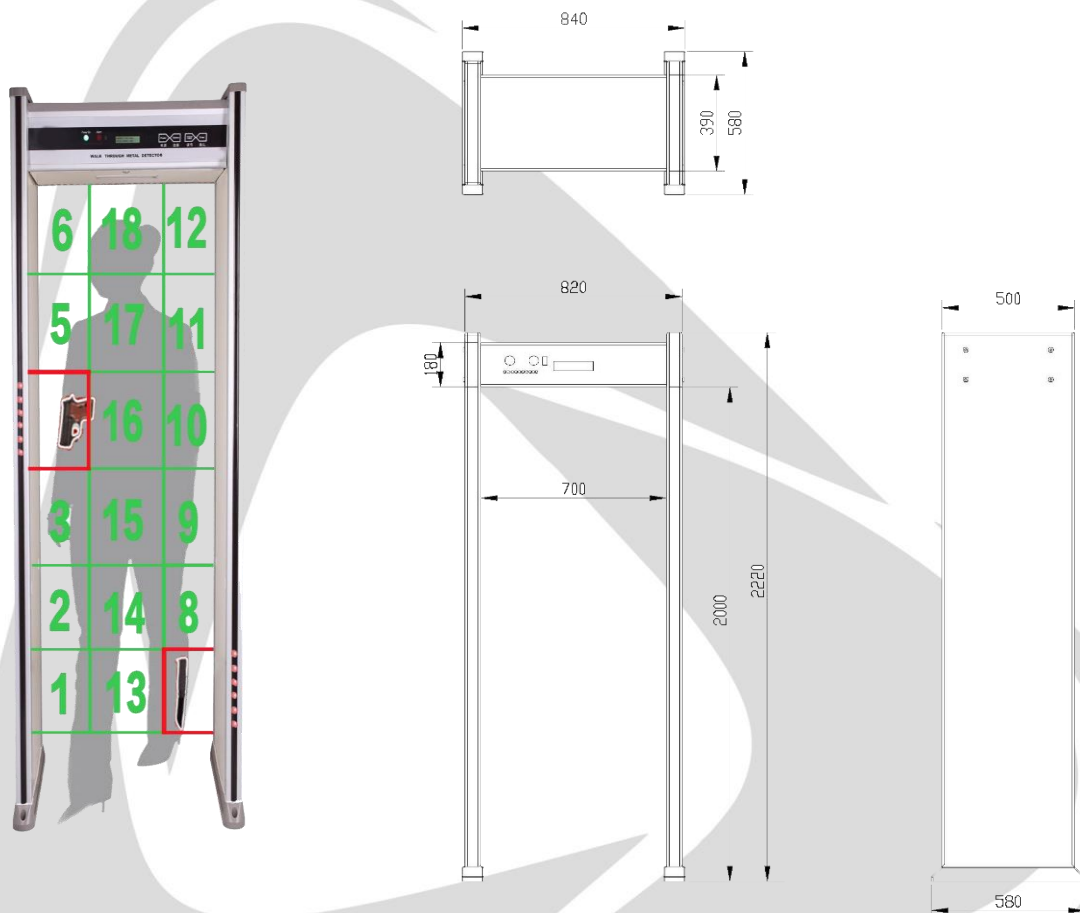

**ADWM-W-18-255**

### Function & Character

1. All weather water proof, IP55 Standard. Durable with Alloy & PVC Construction.
2. LCD Screen Display: LCD Screen Display with two version of Chinese and English menu. Easy to view and operation.
3. Alarm: Audible tone and volume adjustable with low, middle and high. Bright LED Visual alarm
4. 18 independent detection zones.  
18 independent distributing search coverage and acousto-optic alarm when target is found. LED gatepost lights directly displays the alarming area which can exactly indicate the target from left, middle and right area.
5. 255 sensitivity level Adjustable Flexibility:  
We can reach the security requirements by adjusting the flexibility. There are 255 flexibility degrees in each detective area.
6. Complex circuit, infrared installation and computer automatic identification decrease the mistakes and missing dramatically. It can automatically show the alarm frequency and numbers of passed people.
7. Password protection setting: You can change the system, flexibility and other setting only after typing in the password correctly and only authorized person allowed to change the setting can't change the settings.

8. Adoption of weak magnetic field launching technology will not cause harm to heart pacemaker wearer, pregnant women, disks and videos.
9. Two or more gates can work simultaneously
10. Network connection, RS485 port can connect max. 32 unit gates. It's easy to control and adjust the progress.
11. Coils transmit frequency is 925 HZ, DSP operating frequency is 50 MHZ, MTBF 3-4 years.

## Dimensions

Outer frame	: 2.2 X0.82 X0.5m (H X W X Depth)
Inner frame	: 2.0X0.7X0.5m (H X W X Depth)
Electric current	: 90-240vAC, 50/60 Hz
Power	: 35W
Net Weight	: about 65kg
Humidity working environment	: -30~45°C, humidity <=95%RH
Standard	: GB15210-2003
